*United  
States  
of  
America*

*To Promote the Progress*

*of Science and Useful Arts*

*The Director*

*of the United States Patent and Trademark Office has received an application for a patent for a new and useful invention. The title and description of the invention are enclosed. The requirements of law have been complied with, and it has been determined that a patent on the invention shall be granted under the law.*

*Therefore, this United States*

*Patent*

grants to the person(s) having title to this patent the right to exclude others from making, using, offering for sale, or selling the invention throughout the United States of America or importing the invention into the United States of America, and if the invention is a process, of the right to exclude others from using, offering for sale or selling throughout the United States of America, products made by that process, for the term set forth in 35 U.S.C. 154(a)(2) or (c)(1), subject to the payment of maintenance fees as provided by 35 U.S.C. 41(b). See the Maintenance Fee Notice on the inside of the cover.

Performing the Functions and Duties of the Under Secretary of Commerce for Intellectual Property and  
Director of the United States Patent and Trademark Office

## [Descriptions of the development]

### [Development term]

Individual mining system for cryptocurrency

### [ Technical Field ]

The execution of this development is regarding the individual mining system for the cryptocurrency.

### [ Technology for the background of this development ]

cryptocurrency or Bitcoin that represents the cryptocurrency is a protocol that engrafted blockchain technology on the financial transaction system. A system that issues currency on the internet through smart contract.

As a type of a digital currency that does not take a visible form, the Bitcoin which is one of the main cryptocurrency has no manager and is traded freely globally through P2P method. The key part of the features of the Bitcoin is in the blockchain that solved the double-spending-problem. There were many digital currencies before Bitcoin, but the reason it was has not been bale to be used as actual currency was because of the risk of the digital currency, an electronic information, being copied and used. Bitcoin uses the information encryption technology known as block chain with the mining method of giving awards and had solved this problem.

At this time, mining the cryptocurrency took on a method of providing a platform that is controlled to mine when the set conditions are satisfied. Hereupon is a new technology to monitor if the user satisfies the set condition while playing the game.

Bitcoin group has achieved 5 Korean patents, 10 more are applied and are carrying out number of blockchain cryptocurrency global patent registration to global patent office such as America, Japan, China, Hong Kong and so on.

Bitcoin group as already achieved patents from the American patent office, which is the center of the world, along with Korea and has registered patent in Japan and has been recognized for the blockchain cryptocurrency technology from global patent offices.

Bitcoin group is a global ctryptocurrency development company and a global leader.

## Strong points of the BTCB coin

BTCB coin has checked the problem of the slow transaction speed of the bitcoin and Bitcoin Bulls was made under the effort of trying to improve this point.

BTCB coin holds a strong security through the agreement algorithm known as the Proof of Work(POW) using the P2P network.

BTCB coin is similar with bitcoin yet holds a different feature. First, the total issue amount is same with bitcoin. We have blocked the main cause where the sign, algorithm and block can be moved unstably through small amount in advance.

Instead of the hash algorithm SHA-256 that can be seen as the demerits of the bitcoin, script algorithm is used. This is a device that prevents abnormal electricity consumption through increased mining level holding a merit that it can be easily mined only with a cellphone as mining itself is not complex compared to bitcoin.

The more important fact is, it creates the block 4 times faster than bitcoin which creates block every 10 minutes. This is our own American patent technology that is only able from Bitcoin Bulls because the important transaction content is saved on the block through on-chain method where it is handled from the Bitcoin Bulls network(Individual transaction made on separate channel(off-chain)) and only the result value is saved on the blockchain. Other matters are handled outside of the blockchain greatly enhancing the network speed(able to reduce the transaction commission) for usage.

## Bitcoin Bulls coin and master node

Due to this, new block is created every 2.5 minutes proceeding 4 times faster for each transaction making it the merit of being able to handle more transaction at the same time.

Instead of stopping here, we have added another merit to the bitcoin Bulls coin. Which is the concept of master node.

## What is a mater node?

- It is a way of ‘mining’ the coin while holding certain sake of the relevant coin.
- Once one holds the qualification of the master node after depositing coin equivalent to the proportion of the initial stake into the wallet, mining is proceeded for 24hour/365 days.
- It is a charming method where there are less electricity consumption and coin is purchased instead of a device being purchased.
- You can check the mining status and cash out anytime, anywhere.

## Features of master node

### 1. Private Send

The key technology. Protects the financial information through coin mixing(hiding transaction record).

### 2. Instant Send

There are standard send and instant send for BitcoinBulls coin. Standard send uses the existing confirm system of the blockchain that takes about 10 minutes, while master node allows instant transaction within 1~4 seconds.

### 3. Governance (management method) voting method

BitcoinBulls coin has established the DAO(Decentralized Autonomous Organization).

### **The master node policy of the BTCB coin is as following.**

- The BTCB coin master node is linked with the mining speed of the bitcoin Bulls.
- Award is given always. 365 days from the moment of becoming a master node.
- Award is given in BTCB coin.
- Amount of award is separated by level.

**Gabriel : Bitcoin mining speed 3,000% UP**

**Raphael : Bitcoin mining speed 2,000% UP**

**Michael : Bitcoin mining speed 1,000% UP**

By applying the master node function, BTCB coin has added another charming reason for possessing the coin, and through this our assets are stabilized, and are doing the best to plan accurate and stable profit to the master node customers possessing BTCB coin.

Anyone who possess certain amount of stake of BTCB coin can become a master node and receive BTCB coin as interest, and it designs a level where mining is possible only with CPU allowing steady road of profit to customers that are not master node.

# ROADMAP

- ▶ Cryptocurrency coin should not be considered as investment but it may earn value as time passes. Also in case the solution executed by the Bitcoin Bulls coin is not actively used in the actual society, the value may drop.
- ▶ Risk of losing fund : The fund that was collected during the procedure of the business is not guaranteed. In case the value is damaged or lost, there are no individual or public insurance agency that can replace the purchaser.
- ▶ Risk of failure : Regarding the fund that was collected during the procedure of the business, business within the bitcoin Bulls coin and other after marketing activities ending in failure or any various risk that may occur from a company during the business is relevant to this case.

The technology innovation such as the development of the quantum computer and so on holds a possibility of causing danger to encrypted communication including bitcoin Bulls coin. In case the bitcoin Bulls coin cannot be used due to various causes that exempted from the guarantee, the loss is responsible by the person who has purchased the coin and the general president Song Myeong Ho does not take any sort of responsibility regarding it.

After the issue date, the BTCB Coin is transferred to the person who purchased it directly without explicit or implicit guarantee without invading the intellectual property right of another person.

Certain jurisdictions does not acknowledge the exemption of the implicit guarantee therefore the exemption of the above implicit guarantee may not be applied.

This document is a conceptual document (whitepaper) explaining the solution and future platform we suggest. This may change or be revised at any time.

However we do not hold the obligation to contact regarding any additional information to the update mandatory recipient of this whitepaper. The pure purpose of this whitepaper is only for discussion. We do not guarantee any current or future values nor will general president Song Myeong Ho does not guarantee how much the coin value will be. We do not provide any financial advise.

We have issued this as a standard outline for the introduction of this “whitepaper”, business model, company and regarding the bitcoin Bulls coin. This project is not a subject for any form of regulation affiliated within the jurisdiction. This whitepaper is not provided in any form of document nor does contribute in proposal and it not considered as a investment explanation for a regulated product within the jurisdiction.

This whitepaper does not provide any advice regarding your participation in the project, and one must not rely on this whitepaper regarding any contract or participation decision.

Without exception, no expression or guarantee regarding achievement and appropriateness of the future prospect or conceptual statement are given.

The use of the company, platform name or trademark other than Song Myeong Ho does not mean any form of affiliation, guarantee for someone or a third party of a person. Refer to this whitepaper for the explanation regarding a specific company and platform.
